Accessible from anywhere

in the office, anywhere in the world

Low transaction charges

Process a refund

Reconcile your transactions
to your bank statement

Use multiple terminals simultaneously,
save the rental costs on card swipe machines

Allow staff access to the system,
can limit their functionality if needed

HOW PAYPOINT WORKS

PayPoint is a virtual terminal payment service offering the ability to manually process credit card payments without having to use a point-of-sale 'swipe' machine. To process a payment using PayPoint the merchant would log in to the secure DPO PayGate Back Office admin website and enter the credit card details on a secure payments page. The payment is processed in real time to the merchant's MOTO merchant account and the transaction status is shown to the merchant, who can print it out if required.

PayPoint is compatible with the following available payment method:

Credit Card

The following banks are able to process PayPoint credit card payments:

ABSA

FNB

Nedbank

Standard Bank

How to get started: Go to <https://www.paygate.co.za/paygate-products/paypoint/> and click on Get Started. We will assist you in signing up to receive the benefits of PayPoint!
